

Why Thermometrics System

Thermometrics is dedicated to create unrestricted end-to-end visibility on the condition and location of goods in the pharmaceutical and food supply chains.

- **Reliable products proven in more than 100 installations.** Thermometrics wireless networks have been deployed globally, with many networks operating for years.
- **Designed for complete supply chain visibility.** Designed for integration of data throughout the entire supply chain into a single platform.
- **Low total cost of ownership.** Thermometrics combines low hardware costs with simple installation and maintenance.
